### SUNGOOD 360

**N\$ 3 413**

- **portable solar oven, multi cooking temperature (Sungood + Suntube + Cookup)**

The SUNGOOD® 360 folding solar cooker features two complementary cooking modes. The first is the Suntube®, a cooking tube that delivers temperatures from 180°C to 240°C for searing food with rapid heat-up. The second, with the Cook UP kettle for gentle, unattended cooking from 100°C to 120°C to preserve nutrients.

*More description*

# SUNGOOD XL

**N\$ 5 342**

- **Solar oven for Home (Sungood + Suntube XL + thermometer)**

The SUNGOOD® XL solar cooker can prepare meals for 3 to 8 people. The SUNGOOD® XL is equipped with the Suntube® XL, a high-capacity cooking tube that delivers temperatures from 180°C to 240°C. The Suntube® XL allows food to be seared with a rapid rise in temperature. SUNGOOD® XL adapts to all your recipes

*More description*

# SUNTUBE

**N\$ 2 352**

- **Wooden support, cooking tube with stainless steel rack 1 liter**

The SunTube® solar cooking tube is specially adapted to the SUNGOOD® solar cooker with its wooden supports. The SunTube® also makes it easy to build your own solar oven. With the Suntube® baking tube, baking quickly reaches temperatures of 180°C to 240°C

*More description*

# SUNTUBE XL

**N\$ 4 099**

- **Wooden support, cooking tube with stainless steel rack 3 liters**

The large SunTube® XL solar cooking tube is specially adapted to the SUNGOOD® solar cooker with its wooden supports. The SunTube® XL also makes it easy to build your own high-performance solar oven

*More description*

# SUNGLOBE

**N\$ 5 477**

- **Parabolic solar cooker of 105 cm diameter**

With cooking temperatures from 200°C to 240°C, the SUNGLOBE® solar barbecue lets you cook all your recipes in a pot, wok or plancha (chicken, ratatouille, bread, pizza, cakes, etc.). Its eco-friendly, healthy cooking lets you rediscover the pleasure of the great outdoors and the flavor of food.

*More description*

# SUNLAB

**N\$ 357**

- **Solar cooker for children**

Designed for children, the Sunlab® solar cooker lets them discover solar cooking through an educational and tasty experience. After building the oven using the 3C rule (concentration-capture-preservation), the little solar chefs create a host of creative recipes. Fruit skewers with melted chocolate, vegetable spreads with cheese, reheatable dishes (...). Easy to use, fun & reusable, the Sunlab can be taken anywhere.

## COOKUP (S)

**N\$ 410**

- **2.5 litre black enamelled steel cooking pot specially designed for solar cooking.**

The black CookUp pot captures maximum sunlight for rapid cooking. Made with a ceramic inner lining to prevent food from sticking, the pot allows you to cook healthier and tastier food.

*More description*

## COOKUP (L)

**N\$ 536**

- **4 litre black enamelled steel cooking pot specially designed for solar cooking.**

This variant of the standard cookup kettle has a larger capacity for larger quantities of food. The black color of the container maximizes the sun's rays for rapid cooking.

# CATEGORY 4: SOLAR LIGHTING

## SUNCASE GEAR

**N\$ 179**

- **Solar lighter (comes in green, yellow, black, white and red colors)**

The SUNCASE solar lighter spreads its wings and concentrates the sun's rays in a focal point for lighting in 3 seconds: wood, brown paper, tobacco, incense (...). Its case gives your lighter wings for 24/24h lighting and prolongs its useful life. Ultralight (12gr) and compact, it fits in your pocket and can be taken anywhere. Waterproof & windproof, the SUNCASE is an indispensable companion.

*More description*

*Demo video*

## SUNSUN

**N\$ 964**

- **Pavet light and PowerBank of 10 000 mAh**

The SunSun lantern is both a 10,000mAh USB battery and a powerful LED lantern, compact, waterproof (IP67) and portable. With the SunSun, you can quickly recharge all your mobile devices wherever you are: camera, smartphone, stills camera, etc. The SunSun lantern is designed to accompany you on the most extreme journeys, thanks to its sturdiness and high energy reserve.
